

EMS | ENHANCED MAILING & SHIPPING

BY NEOPOST

More Than Mailing and Shipping, Redefine Customer Loyalty

Whether you manage a mail center or ship packages, EMS by Neopost enables you to mail and ship packages quickly, efficiently and economically.

Improving Customer Loyalty Just Got Easier

Keeping the lines of communication open with customers is one area where businesses may fall short, not by any fault of their own. Much of it is due to incorrect addresses and lost packages in the mailing and shipping stream. These lost packages result in unaccounted mailing costs and unhappy customers. Besides eroding the bottom line, the expense of not communicating with a customer is even greater – it diminishes loyalty.

Customers expect their packages to arrive on time, therefore, you should expect a simple solution to process your mail and save money. Don't settle for anything less.

The powerful analytics of EMS offer an assortment of tools designed to manage costs and build customer relationships. This technology can analyze your company's mail and shipping operations and pinpoint incorrect addresses, lost packages and identify where money is being wasted. The address correction feature eliminates many of the problems that lead to returned and misdirected deliveries, delayed deliveries and address correction fees. Additionally, EMS helps you manage and allocate costs by account, carrier, special service and operator productivity.

Neopost Enhanced Mailing and Shipping

Maximize the Delivery Process

EMS was designed from the ground up to fully utilize the Internet and your facility's network capability taking complete advantage of better communications with carriers and customers alike. EMS has the most extensive set of analytical tools and reports in the market to help you save money, eliminate waste and maximize the delivery process:

- **Shape Up Advisor** analyzes mail center operations and identifies where money can be saved. Plus it pinpoints departments that are the biggest spenders.
- **Advisor™** reports help analyze your company's shipping operations and offer advice on ways to reduce costs.
- **PAR™** program researches traceable packages by accessing the Internet. It reports a package's route and delivery status. This powerful program is set up with trigger emails that automatically send a delivery status to recipients.
- **What if Report** provides analysis of actual usage by carrier including surcharges and fees, and also guides users to cost-saving alternatives.

Multiple Shipper Number Support

EMS provides support for complete company identities, allowing the shipper to process for multiple divisions, clients or customers. This powerful feature creates a separate return address and discrete billing based on carrier account numbers, which saves accounting time and increases accuracy. It is indispensable for separate entity support to third-party logistics providers (3PL).

Database Interchange (DBI) Enhanced Option

DBI is an integration tool that allows users to map and exchange data between fields of ODBC-compliant databases and the EMS database. This enhanced feature allows faster processing while virtually eliminating error-prone, illegible, handwritten information.

Why Choose Neopost?

Neopost is a global leader in mailing solutions, shipping services and digital communications. We believe that people are the key to business success. That's why our products and services are tailored to help your organization improve the quality of its interactions and bring people closer together.

In this age of multichannel communications, we guide and empower you to interact in new and innovative ways. We advise you on how to create cost-cutting synergies. We deliver global coverage with a strong local presence, offering you continual support by phone, onsite or online.

Today, Neopost is present in 31 countries and has a network of partners in more than 90 countries. We promote responsible business and sustainable development through our products and outreach programs. Our 6,200 employees worldwide are committed to making your interactions more responsive and more powerful - offering you a competitive edge that will open up a wealth of business opportunities.
